

Database System Project Submission

The submission content is divided into four parts: project report, oral presentation file, source code and database files, and demo video.

Submission File Description

1. Project report

Submission file:

- `1. Project report/Smart Parking Allocation & Cruising Reduction System Based on Real-Time Reservation Database.pdf`

This file is the final project report, written using the IEEE international conference paper template.

2. Project oral presentation

Submission file:

- `2. Project oral presentation/Intelligent Parking Allocation and Cruise Reduction System.pptx`

This file is the project oral presentation slides, used for classroom presentation.

3. Source code and database files

The archive:

- `.env`
- `.env.example`
- `.gitignore`
- `.python-version`
- `pyproject.toml`
- `requirements.txt`
- `uv.lock`
- `README.md`
- `README.pdf`
- `README.en.md`
- `README.en.pdf`
- `README.ko.md`
- `README.ko.pdf`
- `README.ja.md`
- `README.ja.pdf`
- `configs/`
- `scripts/`

The multilingual README files in this directory already describe the software running method, environment dependencies, module structure, main script usage, and core function and method features, making it convenient to reproduce the experiments and inspect the code implementation.

4. Demo video

Submission files:

- 4. Demo video/Baseline.mp4
- 4. Demo video/Smart_Booking.mp4

Baseline.mp4 shows the baseline blind parking-search scenario, and Smart_Booking.mp4 shows the intelligent reservation and dynamic allocation scenario.
